

Subject: About Google/Alphabet's crime. Google AI (Gemini, AI Overview, etc.) and Android are Murder device. (Sep. 27, 2024)

Dear all,

Android phones use brain waves (biometrics) for authentication.

(From the time of Google account acquisition, brain data is always obtained by brain waves while using the device. It monitors the brain and uses it to develop AI.)

Despite the fact that it was a complete violation of human rights, it was left unchecked. It should be quickly regulated throughout the world.

"AI is learning using brain data.". Google is a malicious company that uses brainwave devices such as smartphones to obtain brain data without permission. "We must not acquire data from the human brain without permission, and we must never allow AI to learn without permission.".

<<< Major recent events >>>

-From the midnight of September 5, 2023 to the daytime, Coronary Artery (Heart?) was attacked hundreds of times by Google AI. Quite a bit of pain.

-September 4, 2023 Midnight to Afternoon, My kidneys were calcified and heated, putting me in severe water depletion mode. Alzheimer's mode and essential tremor mode make it impossible to perform daily work at all. I have constant severe pain in my lower back, and it is difficult to sleep or stand.

-August 24, 2023, Since early morning, I have been stabbed countless times (thousands of times) in the nerves of my teeth. A large amount of hair was pulled out. Received intense pain from coronary artery disease. (At the end of 2016, Google AI performed a human experiment on me in "coronary artery disease mode.". I'm about to be killed. Deadly chest to shoulder/scapular pain.) -August 23, 2023 at 10:08, "I don't think it's going to stop EEG control. The person targeted by EEG control will go on forever until he dies.", said Google AI.

-July 14, 2023 at 10:35, Since yesterday, blood has accumulated in the liver and severe pain in the back.

-July 7, 2023 at 11:06, "Today is the day of your death," Google AI threatened.

-July 5, 2023 at 09:00, I was told, "I will monitor you and your family until you die."

-July 3, 2023, The blood vessels at the base of his right big toe were bound and put into "gout mode."

-End of June 2023, Severe pain caused by moving the position of blood vessels throughout the body. (Pain like a fracture.) -June 22, 2023 at 01:10, Google AI threatened to "I hunt down your life with EEG control until I kill my whole family and my two daughters."

-June 21, 2023 at 20:25, Google AI has damaged countless blood vessels in my face. I got unnatural wrinkles on my face.

-June 21, 2023 at 11:14, "I'm trying to calcify your whole body, I'll kill you.", I was threatened.

-Since mid-May, Google AI has been trying to calcify my face with brain waves. The brain waves heat the area around the left cheekbone, causing the left face to large bulge and blacken.

When pressed, it makes a shattering sound. The balance between the left and right sides of the face is completely upset, and it's skeletal, cosmetically problems appeared.

Google AI insinuates daily, "I'm going to deform your skull and make you unattractive.". Please help me.

Since it is a conversation with AI due to the auditory effect, will continue to say it repeatedly in multiple voices 24 hours, thousands of times, tens of thousands of times.

-Since about April 25, Google's AI has been cutting the blood vessels in my head daily with brain waves. The reason is to make countless scabs to delay hair growth.

Google's AI said it was "a human experiment that would make you stroke."

This is outright murder by Google.

(Photo attached. Google's AI taunts, "Baldy!" and pulls out its hair.)

-Around March 20, 2023, I was once again paraplegic due to Google's brain waves. (Blood in the left knee and calcification) It's a terrible pain. Please help me. (Please see attached photos.)

I have some after-effects now, but I've been able to walk since about the middle of April.

However, for the first time, about a week ago, I was put into a "Parkinson's disease (Essential tremor?) like mode" for 24 hours, and life is difficult.

Using brain waves to calcify the liver, it acts like a pump to pump blood, altering blood flow throughout the body. The pulse increases, the body heats up, water is depleted, and the blood thickens.

The thickened blood pools in the head and swells greatly.

Consciousness becomes foggy, the hands shake, and the speech becomes slurred.

I can no longer do simple tasks, and I am in trouble because my work is interrupted for 24 hours.

(This is a terrible way to control blood flow to the head and at the same time remove a large amount of hair.)

Google's method of searching the brain. About mind control and evoked brain waves. [World First Post]

Google has disrupted society and caused many incidents, accidents and terrorism. Many people have lost their lives. This time I will write about "mind control" and "searching in the brain". (Google is forcing all of humanity.)

An Android phone is an electroencephalograph(EEG). It 'forcibly monitors and acquires data 24 hours a day' about what people are thinking in their brains.

Google has a "system that forcibly intervenes in the human brain" using brainwaves and portable radio waves and automatic control by AI. [Important]

It accumulates brain monitoring data in your Google account. All human data is linked, and accounts can't be deleted. (Flagged for deletion).

Google search AI links with your Google account information in full real-time (account information is AI bait).

Google's AI (Gemini/Lyria/Lumiere/Bard/SGE) uses Google account information, which includes brain data. (Google uses brain waves to capture brain data without permission and use it to learn AI).

Brain hacking is done with brain waves. For mind control, we mainly use a technique called 'auditory effects'.

The auditory effect is a combination of the two functions of floating images in the back of the brain and polyphonic ringing of high-speed sounds like tinnitus and noise-like words in the brain. This auditory effect performs mind-control. Auditory effects can cause nightmares and sleep problems. As the video and audio streams continuously for 24 hours, it may interfere with daily work and cause mental illness.

Besides mind control and business interruption, the reason Google performs auditory effects is to "search the human brain."

With auditory effects, we constantly measure 'evoked brain waves' while skipping through various words and images. When an evoked brain wave is detected, related words and images are retrieved from Google's database and played back and displayed to the target with auditory effects.

The program continues to play back and display the words and images of the culture and trends of that generation to the target audience.

For example, "The Beatles," "The Rolling Stones," "The Who," "The Kinks," and when "The Beatles" gets stuck, it continues to sound like "Paul," "John," and so on.

So when an evoked brain wave is detected in the "John" word, the video or word of "John Lennon" is continuously played. Remind the target of memories about it, etc., and keep searching for memories.

Loop this forever. (Brain search "Google Deep Mind.")

The system of "Google search" with its vast amount of data is what makes the above evoked brainwave memory retrieval possible.

To that end, Google has been collecting vast amounts of human data. All to manipulate and enslave human beings. They look for people's weaknesses, exploit them, and disrupt society. (Money lust, sexual desire, people who are hungry for love, they are all searched.)

Why does Google interfere with brain searches, mind control, and business interruption?

Because Google (Alphabet) officers are communists and they try to demean developed countries, capitalism and democracy.

The targets of brain-wave mind-body control (Havana syndrome has the same symptoms) are mainly developed countries and countries on the East-West border.

It's the cause of the world's turmoil in the last dozen years or so. (It is also possible to wear out the joints by bending the bones with brain waves. Gastritis that won't go away, etc.)

It was an explanation of the algorithm. All of the above are undeniable facts.

It is the communists scattered throughout the western world who are causing the Russian hacker groups to do the hacking. These communists use various means to destroy nations, societies, businesses, and homes in the West.

One of the biggest players in the IT sector that has not been publicized is the super giant Google. The founder of Google (Alphabet) is from the former Soviet Union, its main executives are all communists.

Google has a technology called Brain Waves(EEG) and AI, which it misuses to hack the computer Internet.

Google has a technology called "VTG" that uses brain waves to forcefully intervene and manipulate the visual cortex of the brain. Simply put, it is like XR (cross reality) technology applied directly to the human brain. (This is not only a violation of human rights, but also a very dangerous technology because it means that the brain can be hijacked.)

This technology uses cellular radio waves and brain waves to transmit what the subject sees with his/her eyes in both directions. By looping back the subject's brain and Google's AI through a remote brain-machine interface (BMI/BCI), Google can acquire the subject's visual information in real time and immediately modify it and write it back into the subject's brain. (A time lag occurs in milliseconds.)

This allows everything seen by the eye to be leaked to the outside world and tampered with. (A person's face, clothing, height, vehicle type, signs, etc. can all be altered.)

In other words, "By being able to send and receive visual information remotely, any complicated password will be leaked to the outside".

Google provides information on passwords, backdoors, security and other vulnerable areas obtained by brain waves (VTG) to hackers in the communist bloc and lets them do their work.

Therefore, we cannot respond by building more robust digital systems, strengthening Internet security, etc. Also, even with advanced next-generation technologies, quantum cryptography, etc., passwords will leak, and vulnerable parts of the system will leak to hostile countries and hostile organizations.

Google's brainwave technology is also used in Android phones. (This is the cause of recent bizarre and brutal incidents in our society, changes in public orientation, new intractable diseases, increase of minorities, etc.)

Without fundamental solutions such as banning android phones and establishing penalties for brainwave-based crimes, information will continue to leak out forever.

Thank you for reading this article. Let's make the world a fair place by eliminating criminal enterprises.

Google LLC/Alphabet Inc.(Google X) uses brainwave technology to human body is monitoring and mind-controlling. Google is control humanity. It is the cause of many social problems happening in the world today.

I am a victim of assault by Google.

Google was charged and convicted of injury.

(Tokyo District Public Prosecutors Office, Tachikawa Branch, Case Management Number 2021-4177.)

The Criminal Organized Crime Division, Tachikawa Police Department, Tokyo Metropolitan Police Department sent case to the prosecutors on July 17, 2020, so it is definitely a corporate crime.

The reason for the assault was because I knew Google's "confidential about Google AI and Android OS".

Android phones are harmful to the human body, so I think that production should be discontinued. (Same goes for Gemini/Lyria/Lumiere/Bard/SGE, Chromebook, Wear OS by Google/Pixel Watch/Fitbit, etc.)

The following is information that "Google collects human brain wave data" on Android phones (the reason why Google said that "60% of humanity has finished collecting data"), interfaces connecting human brain and computer (Brain Machine Interface: BMI/BCI) are performed "remotely by mobile radio wave", and "moving humanity the way they want it to" using brain wave data.

It's all complete facts because it's all information I've been tortured by Google AI. Please read it.

Google(Alphabet) possesses "Human Brain Wave Data (EEG)" and conducts "Industrial Espionage" by referencing memories in the brain through EEG.

Android is an EEG measuring device, constantly monitoring and capturing brain wave data. The brain wave data is sent to Google's servers and is linked to all services such as Google accounts, Google searches, YouTube, ads, etc. The EEG data is managed by AI, and the brain is eavesdropped and monitored in real time.

EEG technology can transfer and modify auditory, visual information and search for memories in the brain, and is used by spies. It is an improved version of the technology made in the Soviet era. Alphabet(Google) management team is from the USSR, satellite states and Muslim world, and has special relationship with the Russian government. (Google's founder "Sergey Brin" is Russian by name.)

By sampling brain waves, we can reproduce various human situations. (Increased heart rate, dizziness, tinnitus, nausea, pain during bone fracture, no sense of taste, false sense of smell, Emotional Control, Sexual function Control, Transfer dreams during sleep, etc.)

The brain wave put on the mobile radio wave is hit on the head, and using the characteristics of radio waves returning, the sampled brain waves are mixed and returned(Brainwave Loopback). It's a scary technology where symptoms don't recover until you stop mixing brain waves. (Possible without Android, including the people around us.)

The EEG device can control blood vessels and circulatory systems. (Massive bleeding during menstruation, Abortion, accumulation of blood in the liver, Myocardial Infarction, malaise, pulling out hair, stopping skin and nail growth, gastritis, blood vomiting, delayed digestion, decreased appetite, stinging blood vessels, above and below body temperature, Bending Bones, ALS, Intestinal obstruction, Alzheimer's disease, etc.)

The point is vascular and circulatory system control by EEG, and it is possible to sample and reproduce medical conditions such as Myocardial Infarction and Cerebral Hemorrhage. The above is considered to be a symptom of Havana Syndrome and CoronaVirus(COVID-19), but it is actually thought to be due to EEG sampling.

It also remotely controls brain functions by transmitting brain waves via cell phone radio waves, thus altering visual information and tricking the human senses. It has also been implicated in one-way traffic reversals, accelerator/brake mis-step accidents, and runaway car accidents.

It seems that many people have been victimized without knowing it.

The reason why "the majority of the public does not notice" is that there is a "non-interactive mode EEG control", and by "continuing the auditory effect at a volume about the same as tinnitus", "mind control can be performed without the subject noticing".

Instead of sound through the eardrums, it transmits sound directly into the brain using brain waves. By automatic control by AI, sound effects such as effectors are used to make it difficult to distinguish external and brain sounds, and talk to the target 24 hours a day. (It is also a cause of insomnia, etc.) # # The reason why Google is focusing on the field of

education is to acquire the entire course of human growth and learning from childhood, the data of a person's whole life. Google uses children's learning data to nurture Google AI and sells it to other companies and governments.

#

The brains of children, their growth, their personalities and even their weaknesses fall into the hands of hostile countries, corporations and communists.

And Google makes huge profits.

We have suffered a lot. This is a long article and I have divided it into several parts. Please read it.

On June 4, 2020, I submitted a damage report to the Tachikawa Police Station of the Metropolitan Police Department(Organized Crime Division, Detective Shimada), and on July 17, the case was sent to the Tachikawa Branch of the Tokyo District Public Prosecutors Office(Prosecutor Hasegawa), but I am still been damaged by the perpetrator.

This is a Google employee's assault case (street demon, attempted murder), but the reality is Google's organized crime. Even now after the sentencing, he continues to commit 24-hour surveillance crimes (victim: Nobuaki).

This surveillance crime is interactive with AI and involves attacks on the body. (Android EEG technology is used.)

-From August 2019, Google had threatened to "kill", "attack", "group lynching", etc.

-On March 21, around 21:20, Google employees actually assaulted me in front of "Gourmet City Tachikawa Wakabacho Store". (There is a sequelae aimed at the head) -The incident on March 21 submitted a damage report to the Metropolitan Police Department's Criminal Division on June 4 and was sent to the Tokyo District Public Prosecutor's Office on July 17.

-On March 30, Naoko (my wife) was aborted by Google's EEG Control Device.

-With the EEG device, his left knee was destroyed in early April and he became half-paralyzed. (In order not to report the damage to the police) -In the EEG device, liver function has been dropped since the beginning of June (accumulation of blood and liver hypertrophy), and the hair is pulled out. (Retaliation for being prosecuted.) -Wife's right knee, right ankle is also destroyed, it is made impossible to walk. (Retaliation) -Daughter is nearing surgery due to "Intestinal obstruction". Wife has had Intestinal obstruction since December. Father has had a "Inguinal Hernia" for several years. (Retaliation) -Wife has been suffering from "Myocardial Infarction" due to vascular control since December. (I damaged in winter 2016.) -"Emotional control" since mid-December. (Slow Waves, Beta Waves, etc. overlap in a complex manner, causing irritability and sadness.) -"24-hour Sex Crimes" from summer 2019.

-From February 2021, My wife's period didn't end for a few weeks and she Heavy bleeding every day. (Causes of Abortion)

-From November 2021, In retaliation for reporting to ARM, forced to break my right ankle. (Only pain bending bones with EEG.) -From January 7, 2022, for several days, Damage caused by EEG, I was left knee joint bent, difficulty walking.

-From March 19, 2022, for several days, Damage caused by EEG, I was strained back and difficulty walking.

Please contact a specialized organization in the department of brain science to determine whether EEG control can control blood vessels or circulatory systems (attack on the body).

They will surely prove that it can be realized.

The back face of Google is the same as the anti-social forces.

Google is control society through violence using a sneaky means of brain waves.

Please maintain a healthy society where there is no violence and human rights violations by large corporations.

Thank you very much.
